Case-dropping stability of unique-person networks
A Alzheimer disease · Women
CS strength 0.60; edges ≥0.70
B Alzheimer disease · Men
CS strength 0.50; edges 0.60
C Unspecified dementia · Women
CS strength 0.60; edges ≥0.70
D Unspecified dementia · Men
CS strength 0.50; edges ≥0.70
E Parkinson disease · Women
CS strength 0.50; edges 0.60
F Parkinson disease · Men
CS strength 0.50; edges ≥0.70
